EXPERIENCE

Trynocode

Jul 2025 - Jan 2026

Role - Software Developer

- Worked on internal and client-facing applications, including **Mabani** and **K2K** projects.
- Converted **Figma UI/UX designs into functional screens** using modern front-end technologies.
- Integrated and tested **REST APIs**, using **Postman** for validation and debugging.
- Identified and resolved UI and integration bugs through testing and iteration.
- Implemented basic application functionality and assisted with backend interactions, including **Firebase** usage for selected features.
- Contributed to building parts of a demo **MVP application** using **React.js**, focusing on layout and component structure.
- Developed a complete **landing page** for the Trynocode website using **Next.js**, including navigation and responsive layout.
- Gained experience working in a fast-paced startup environment with real development workflows and collaboration tools.

Whizkey

Jun 2024 - Aug 2024

Role - Summer Intern

Remote

- Built a lead-generation database of 250+ potential clients, supporting business outreach efforts.
- Wrote **SEO**-optimized technical articles to improve website visibility and engagement.
- Participated in a company-wide business hackathon, contributing ideas and research.

EDUCATION

Bits Pilani Dubai Campus

2022 – 2026

B.E - Computer Science - CGPA - 8.0

Dubai

Bright Riders School

2014 – 2022

Grade 4- Grade 12

Dubai

PROJECTS

Smart Medical Box | Tech Stack Used - Python, Flask, Raspberry Pi, OpenCV, Servo Motors, YOLOv5.

- Designed a smart medicine dispenser prototype using **Raspberry Pi** and **Servo Motors**.
- Implemented scheduled pill dispensing logic using **Python**.
- Integrated a camera module with **OpenCV** for basic pill detection and verification.
- Developed a lightweight **Flask** web interface to monitor system status.

Customer Segmentation using RFM Model | Tech Stack Used - Python (pandas, NumPy, scikit-learn), Matplotlib.

- Performed customer segmentation using RFM (Recency, Frequency, Monetary) analysis.
- **Applied K-Means** and **RM K-Means** clustering algorithms.
- Improved clustering accuracy through **data preprocessing** and **normalization**.
- Evaluated model performance using Silhouette Score.

AI Based Interview Assistant | Tech Stack Used - Python, Matplotlib, Tkinter, Google Speech API, Language Tool.

- Developed a prototype system to analyze interview responses using text and voice input.
- Applied **sentiment analysis** and keyword-based scoring techniques.
- Generated automated feedback reports with visual summaries.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML, CSS, SQL, JavaScript(Basic).

Databases and Tools: MySQL, FireBase, Postman, Figma, Github, Git, Raspberry Pi, Browser Dev Tools.

CS Concepts: Rest APIs, API Testing, Basic System Design, OOPs Concepts, DSA, Debugging and Issue Analysis.

Technologies/Frameworks: FastAPI, Flask(Basic), React JS(Basic), Next JS(Basic).

Libraries: Scikit-learn, NumPy, SciPy, Matplotlib.

Soft Skills: Communication, Creativity, Problem Solving, Quick Learning, Adaptability.
