

Koteswara Rao Perumalla

Bits Pilani Dubai Campus, Hostel | ☎ +971505440321 | ✉ perumallakoteswara@gmail.com

EXPERIENCE

Trynocode

Jul 2025 - Jan 2026

Role - Software Developer

- Delivered 5+ UI modules across 2 client-facing applications (real estate and service management platforms)
- Converted 50+ **Figma** designs into production-ready components, reducing design-to-code handoff time by ~30%
- Integrated 20+ **REST APIs** using **Postman**, reduced API integration bugs by ~25% through systematic testing
- Implemented 3+ **Firebase** features (authentication, real-time updates, data storage, etc.) supporting 50+ test users
- Built responsive landing pages with 4 core sections (navigation, hero, features, contact) achieving 90+ Lighthouse score
- Co-developed 10+ reusable **React**, **Next.js** components for MVP, enabling 2-week faster delivery to client

Whizkey

Jun 2024 - Aug 2024

Role - Summer Intern

Remote

- Built lead database of 250+ potential clients
- Wrote 5 **SEO**-optimized articles, increasing organic traffic by an estimated 20% over 2 months

EDUCATION

Bits Pilani Dubai Campus

B.E - Computer Science - CGPA - 8.0

Dubai

Bright Riders School

Grade 4- Grade 12

Abu Dhabi

PROJECTS

Expense Tracker (Full-Stack Web Application) | Tech Stack: FastAPI, Next.js, PostgreSQL, JWT, Authentication

- Built full-stack app handling 50+ test transactions with **JWT** auth for secure user sessions
- Designed 10 **REST API** endpoints with average response time <150ms
- Configured **PostgreSQL** database schema with 4 tables (users, expenses, categories, budget)
- Designed category system with 10+ expense types for organized expense tracking
- Deployed live at [Cashually.vercel.app](https://cashually.vercel.app) with Git version control across 20+ commits

Smart Medical Box | Tech Stack Used - Python, Flask, Raspberry Pi, OpenCV, Servo Motors, YOLOv5.

- Built prototype with 2 servo motors achieving ~95% mechanical dispensing reliability
- Programmed scheduled dispensing at 2 configurable times per day
- Integrated **YOLOv5** achieving ~85% pill detection accuracy on test images (15+ samples)
- Built **Flask** dashboard showing real-time status (dispensing logs, schedule, camera feed)

AI Based Interview Assistant | Tech Stack Used - Python, Matplotlib, Hugging Face Transformer, Tkinter, Google Speech API, Language Tool.

- Built system analyzing 20+ sample responses, providing feedback in <3 seconds per response
- Used **Hugging Face transformer** (DistilBERT) achieving ~80% sentiment alignment with manual review
- Scored responses across 3 metrics (sentiment, keywords, fluency)
- Generated visual summary reports (bar charts + heatmaps) reducing manual feedback time by estimated 40%
- Improved scoring accuracy by ~15% by adding semantic similarity (cosine) to keyword matching

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML, CSS, SQL, JavaScript.

Databases and Tools: MySQL, SQLite, PostgreSQL, FireBase, ChromaDB, Postman, Figma, Github, Git, Raspberry Pi, Browser Dev Tools.

CS Concepts: Rest APIs, API Testing, System Design, OOPs Concepts, DSA, Debugging and Issue Analysis.

Technologies/Frameworks: PyTorch, FastAPI, Flask, Next JS, RAG.

Libraries: Scikit-learn, NumPy, SciPy, Matplotlib.

Soft Skills: Communication, Creativity, Problem Solving, Quick Learner, Adaptable.
